With respect to applicants' arguments filed on July 03, 2004, the examiner found arguments to be persuasive and therefore the previous Final rejection has been withdrawn and the application is in condition for allowance with the minor changes of the following:

Drawings

The proposed drawings correction and/or the proposed substitute sheets of drawings, filed on July 03, 2004 have been approved.

EXAMINER'S AMENDMENT

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on August 6, 2004, requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 13-0005 the required fee of \$110.0 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, line 10, "another" has been changed to --to the other--

Claim 1, line 14, "cancels" has been changed to --adapted to cancel--

Claim 11, line 12, "another" has been changed to --to the other--

Allowance

The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-12 are allowed because there is no prior art of record that teaches or suggests a door suspension system possessing the entire combination of features specified by the claims. In particular, while features may be individually known, there is no suggestion or motivation from the prior art to make the proposed modification to combine that would render the prior art invention being modified satisfactory for its intended purpose. Further, the modification of Anderson would change the principle of operation of the prior art being modified, and there is no convincing line of reasoning as to why the artisan would have found the motivation to modify Anderson that would have been obvious in light of the teachings of Bonar. Further still, the combine references would not have been obvious to arrive the claimed invention that would produce a reasonable expectation of success as applicants' claimed, i.e., "said attraction force adapted to cancel at least partially a weight of the door". See claims 1, 11, and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khoa Tran whose telephone number is (703) 306-3437.
